At Centene, we believe environmental stewardship is sound business practice. Our commitment to innovative healthcare extends to our commitment to innovation in our business operations through conserving resources, pursuing projects that advance environmental resilience, and contributing to efforts to reduce the impacts of climate change and promote a healthy

## Guiding Principle 2: Clean

Reduce greenhouse gases and environmental impacts of our footprint.

Reduce our consumption of products that produce waste to promote a healthier environment.

This principle guides our approach for considering and engaging in

- Renewable energy sourcing
- Clean disposal of waste and recycling
- Conserve and support clean water

## Guiding Principle 3: Contribute

Pursue projects that generate beneficial climate and environmental impacts beyond the Centene enterprise

There are many linkages between environmental factors and health outcomes. In addition to the actions we take as a company, we commit to being active in supporting broader efforts to protect the environment and address climate change impacts to benefit the communities we serve and our world

## Guiding Principle 4: Commit

We commit to operate in compliance with all applicable federal, state, and local environmental requirements.

We commit to continuous improvement of environmental performance.

We commit to consult with internal and external stakeholders on environmental issues and raise awareness, including training for employees

We commit to measure, disclose and regularly report meaningful metrics in accordance with the following environmentally focused standards and frameworks

- Task Force on Climate-related Financial Disclosures (TCFD)
- Sustainability Accounting Standards Board (SASB)
